

TORCH-ON MEMBRANE

4mm polymer elastoplastomeric bitumen membrane re-inforced by non-woven polyester continuous strand

1. USES

- Flat Roofs
- Slab covering
- Plant Boxes

2. ADVANTAGES

- Excellent weathering properties.
- Tough and flexible.
- Excellent adhesion.
- Ease of application.

3. LIMITATIONS

Do not apply if rain is imminent.

4. COVERAGE

Each roll covers 10m².

5. SURFACE PREPARATION

All surfaces should be sound, clean and free from any contaminants.

6. APPLICATION

Surfaces must first be treated with a suitable Bitumen Primer.

Torch-on application of the membrane should always be done in temperatures above 5°C.

Care should be taken not to overheat the membrane as this will cause damage to the re-inforcement.

There should be transverse overlapping of the rolls by about 10cm and longitudinal overlapping by about 15cm.

The finished surface should be coated in a suitable UV protective layer which should be renewed every 2-3 years depending upon local conditions.

7. DISPOSAL

Dispose in accordance with local regulations.

8. HEALTH & SAFETY

Safety data sheets available on request.
